SOUFFLE (30 mn)

CHOREOGRAPHED CIRCUS

Souffle features a dancer-acrobat, who vibrates to the rhythm of a score composed of breaths and cellos. *Souffle* is a hymn to the breathing body, to life.

From this intense circus dance, both fluid and combative, springs a communicative energy.

The mystery of breathing is that it occurs in us without us deciding it; in a movement independent of our will: «it» breathes in us. We are rhythms of air and flesh. This intimate breathing movement which distributes energy in the body, brings us closer to the outer worlds. Here he is confronted with the rhythm of an external breath.
